KUBOTA Reman

Remanufactured Parts Exclusively
for **Kubota Industrial Engines**

KUBOTA Reman

RESPONSIBLY REMANUFACTURED

- Now you have another option from Kubota! Purchase either new or remanufactured parts.
- Kubota only uses factory-quality components for the remanufacturing process. This maintains the reliability you've come to expect.
- Each remanufactured part comes with a one-year remanufactured parts warranty.¹

¹Refer to Limited Warranty on remanufactured parts statement for details.

ALTERNATORS

STARTERS

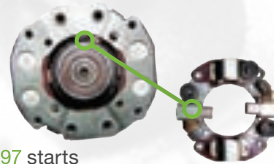

KUBOTA REMANUFACTURED ALTERNATORS & STARTERS

Test Starter #1

After completing 22,497 starts, the brush material remains in contact with the starter armature. This **remanufactured** starter still has several starts before brush failure.

The wrong brush material composition resulted in a short **aftermarket** starter life due to excessive brush wear, resulting in a loss of brush contact to the armature.

Kubota Reman

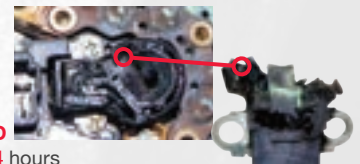

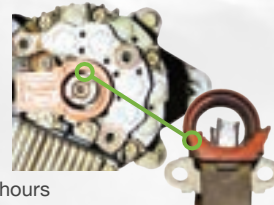

Aftermarket

Test Alternator #1

After 251 hours of testing, the **remanufactured** unit shows no signs of overheating. The brush holder, seal and brushes are in good condition.

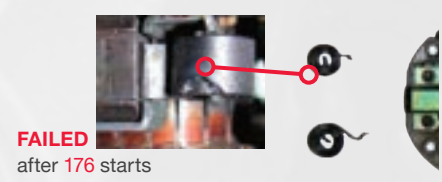

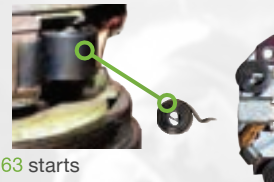

Inferior plastic used in the brush holder of the **aftermarket** part resulted in failure due to melting under high-heat situations.

Test Starter #2

Remanufactured starters are assembled with the correct brush springs, and the springs are in the correct position on the brushes.

Aftermarket manufacturer use of the wrong brush spring and poor assembly techniques resulted in failure due to incorrect placement of brush spring on brush.

NO CORE HASSLE

Core ships directly to Kubota!²
