

The Right Way to Replace Your Kubota Engine

We want your Kubota engine to be your workhorse - the one that keeps running against all odds. Whether it's in a light tower, welder, air compressor, aerial work platform, trencher or any of the countless applications for Kubota industrial engines, Kubota builds its engines to the highest quality standards. Their durability and performance are carefully engineered for the most challenging work conditions.

Even so, there may still come a time when your engine needs replacement. If you decide to replace your engine instead of repairing remember you get a warranty of 2 years or 2,000 hours, whichever comes first. [Visit our website for more warranty details.](#)

WHAT YOU NEED TO DO:

1

Collect essential information about your engine.

To start, you'll need to have the following information:

- The engine serial number
- The make and model of the equipment that's powered by your Kubota engine

Where to find your serial number:

The serial number location varies by engine. To find it, reference the illustrations and descriptions [on our website.](#)

2

Contact your Kubota Engine America distributor for pricing and availability.

With your Kubota distributor's extensive engine expertise, you'll be sure to find the right replacement engine for your equipment. Self Service OEM equipment requires that you contact their dealer network directly. Your Kubota distributor will be able to provide you with more details.
