APPLICATION REVIEW PROCESS

The Kubota Engine America (KEA) application review process is intended to assist the OEM with engine installation to optimize functionality/performance within the

OEM's equipment in order to maintain durability, customer satisfaction, and reduce warranty failures and expense. Kubota cannot anticipate all potential failures and issues that may occur with the engine or product in the field during and application review, therefore, machine testing by the OEM either in a test facility and/or in the field is critical to further reduce the potential for field failures

The amount of time spent by KEA on an application review is significantly less than the amount of time spent by the OEM's design engineers on the application. Because of this, the KEA application review is intended to identify issues that are within the scope of the application review testing performed and in some cases recommended possible solutions. The KEA application review should never take the place of proper design and testing of the finished product by the OEM.

The KEA application review does not in any way express or imply any additional warranty coverage other than what is stated in Kubota's Limited Warranty Agreement. Kubota and its subsidiary companies are not responsible for (including, but not limited to); failures resulting from any components that are not manufactured by Kubota, misrepresented or incorrect information provided from an OEM, any changes made without KEA's knowledge, any decision by the OEM not to follow KEA's recommendations, or any application related problems or deficiencies that may arise that were not found by KEA's limited application review or the OEM's durability testing.

THIS IS THE ONLY EXPRESS WARRANTY ON OUR PRODUCTS

We neither assume nor authorize anyone to assume for us any other express warranty. The Kubota Distributor/Dealer has no authority to make any representations or promise on behalf of Kubota Engine America Corporation or to modify the terms or limitations of this warranty in any way.
